

CONSCIOUSNESS, INTENT, AND THE STRUCTURE OF THE UNIVERSE

by Jeffrey Keen

Book Review by Will Clark

Man has been aware of unseen, but perceived, fields and earth energies for at least 5,000 years and maybe even longer. However, progress in understanding these phenomena have not been as rapid as that of other sciences. In addition, there is currently a receptive population, with many relevant societies and groups worldwide interested in consciousness and dowsing earth energies, together with their associated topics.

Currently the time seems right, and perhaps even necessary, regarding today's issues around integrity and truth, for studying dowsing scientifically. The fascinating and as yet inexplicable, aspects of dowsing are no more unbelievable and seem to involve similar concepts, as other current research topics in mainstream physics.

Consciousness, Intent, and the Structure of the Universe, by Jeffrey Keen, is a ground-breaking book, which challenges accepted beliefs, and proves with scientific precision, that consciousness involves more than just your brain and it actually depends on the very fabric of the Universe.

Jeffrey explores "consciousness and its relationship to the universe." This book is the culmination of years of research by Keen who has identified, observed, and measured "Universal Energy Fields" that had not previously been detected, either by

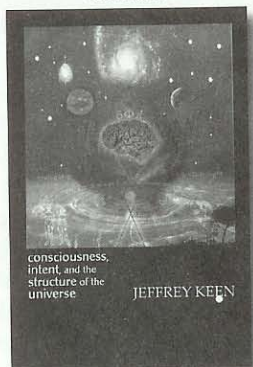

the usual five senses, or by existing scientific instruments. Through his pioneering discoveries, this book unquestionably demonstrates and explains the ancient mystery of dowsing and its connection to the cosmos.

Dr. Patrick MacManaway, President of The British Society of Dowzers states; "in pursuing his research, that is presented in this book, Jeffrey Keen has superbly embodied one of the British Society of Dowzers founding objects - 'To encourage the study and advancement of the knowledge of the scientific principles of dowsing...'

I congratulate Jeffrey Keen on bringing his clarity of mind and refined specificity of focus - two keys to successful dowsing - to bear on this subject, for bringing the worlds of the mystic and the scientist into collaborative coherence, and for bringing his profound conclusions to public attention."
